

Amendments to Specification

Please replace the paragraph bridging lines ¹⁸⁻²¹4-7 on page ⁴3 with the following

paragraph:

TJ 2-19-07

Preferably the re-probe recovery rate information includes a limit value. In one embodiment for wafers with more than a few hundred ~~[[dice]]~~ dies the limit may be 2%. In other embodiments a limit may be set as three times the standard deviation of the re-probe recovery rate from previously supplied data.
